Beauty with Integrity is Clean Beauty

Our Corporate Initiatives to Promote Sustainability, Ethical Sourcing, Social Responsibility and Transparency

A few words from our Founders - David and Melody Howell ...

No longer a trend, the groundswell demand for healthy, clean beauty products has permanently created a lasting and overarching “Beauty with a Conscience Movement”. Toxic, unsafe, and ill-perceived ingredients are driving consumer demand for clean and natural alternatives that are user and environmentally safe, and ethically and sustainably sourced.

At Integrity Ingredients Corporation (IIC), we are *Advancing the “Beauty with a Conscience Movement”* in our efforts to globally commercialize highly efficacious technologies derived from indigenous cultures who are in desperate socio-economic need. In addition, we actively seek natural, innovative ingredients that feature a reduced carbon footprint and proven, sustainable traceability from farm-to-formula and earth-to-product. To date, significant financial investments have been made in needy communities in Alaska, West Africa, Quebec, Canada and Columbia, South America and more.

Alaska and Quebec, Canada – Lower North Shore

IIC has commercialized 16 wildcrafted berries, plants and pure plant extracts derived from the pristine ecosystems of the Boreal Forests located in Alaska and Quebec’s sub-arctic region, the Lower North Shore. Due to past economic-political factors, the local fishing industry was severely impacted, and the unemployment rate increased to more than 50%.

IIC’s commercialization efforts have significantly increased local employment opportunities, bringing back families previously forced to move away. Now, the Lower North Shore region is bustling with reunited, happy people who prosper through the local manufacturing of indigenous, nutrient rich ingredients. Some of these products feature ORAC values of 700 + and are extraordinarily rich in vitamins, antioxidants, polyphenols and Omega fatty acids.

Colombia, South America

Kahai™ (Cacay) Oil: IIC actively supports the employment of the local Colombian community who harvest the Cacay nuts that are then sustainably manufactured to produce the oil within their region. Highly nourishing, Cacay Oil contains 50% more Vitamin E and twice the amount of Linoleic Acid than Argan Oil. Cacay Oil is a 100% natural, highly efficacious, anti-aging dry oil that is extremely rich in natural Vitamin C as well as high amounts of Vitamins E and F. Clinical studies conducted on the oil show 95% improvement in skin wrinkle reduction, 100% in hydration, 100% in skin firmness, 85% in skin smoothness and 80% in skin elasticity.

MagNUT Sense Oil: MagNUT Sense Oil is a 100% natural, virgin oil harvested from the Monkey Pot tree grown in the Colombian Caribbean along the Magdalena River banks. Income opportunities for the region are scarce to non-existent, and the population often resorts to deforestation for employment. We employ the locals to protect the trees and to harvest the Monkey Pot nuts which are gathered by hand and cold pressed to preserve their purity and efficacy. They are rich in Vitamin E, antioxidants, Omega’s 3, 6, and 9 and contain more than 70% fatty acids.

MagNUT is also a rare source of natural Selenium, a powerful mineral that helps to firm the skin, as well as provide strong antioxidant benefits. Upon application, the oil forms an elegantly dry, protective film that promotes long term hydration and prevents moisture loss. A clinical study proved that MagNUT Sense Oil significantly reduced wrinkles in 90% of the volunteers at 4 weeks.

West Africa

We are proud to acknowledge that AAK’s most noble accomplishment is its humanitarian support and monetary advancement for West African women who have been socio-economically suppressed within their native culture. These women have struggled physically and financially to protect and provide for themselves and their children. They have not only suffered the ravages of poverty, but have often been subjected to rampant corporeal assault and abuse.

AAK teaches the local women how to protect themselves and their youth, while also employing the adult females to collect the Shea nuts in the wild. These women are supplied with all of the necessary materials to purify the nuts right at the collection sight which includes a specific type of cooking vessel uniquely and conveniently designed for the outdoors.

With AAK’s strong communal support coupled with the wages that the women earn, the community is actively progressing by building schools to educate all of its people and more. We are humbled, but very honored to recognize that each one of these African women is advancing her individual self, her family, as well as her indigenous tribal culture. In turn, this collectively and significantly propels the entire community to learn, significantly grow, and to ultimately thrive.
