EXSYMOL

In the Principality of Monaco

EXSYMOL

Founded in 1972 in Monaco, between France and Italy, EXSYMOL offers its products throughout the world through a network of more than 40 distributors.

The success of EXSYMOL is based on a strong and effective concept: understanding the skin's needs and providing cosmetic solutions with pharmaceutical rigor.

Specializing in bioactive Silicium, EXSYMOL has adapted its technology to create a range of cosmetic active ingredients: SILANOLS.

This is how Exsymol was a pioneer in the treatment cosmetics market with applications close to dermatology and, for the future, the development of a true cosmeceutical proposal.

Creator of innovative solutions

2021 - Year of Silicium

« For nearly 50 years, EXSYMOL has been developing renowned, innovative and effective active ingredients for cosmetics, always ensuring that they are completely safe. »

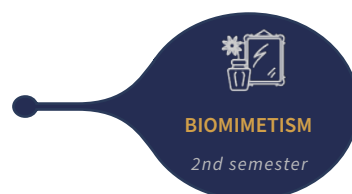

« Faced with unexpected challenges in 2020, the EXSYMOL teams have demonstrated their ability to adapt and innovate to offer you a year 2021 of immersion in the world of silicium.

Silicium being an essential of the skin and of treating cosmetics, we present to you the past (the **X**perience) and the present (the **X**pertise) of our technology based on silicon whose active principles are SILANOLs.

You will discover the future of our technology and silicium, in 2022, during the celebration of the 50 years of EXSYMOL.

Our “Skin **X**perts” will regularly share with you their understanding of the skin and the solutions to take to take care of it in all situations:

Our Marketing and Communication department offers you the ingredients to match current themes and will demonstrate innovation to meet future trends!

Finally, our sales team is strengthening and revitalizing our links with our distribution network to be ever closer to you.»
