

# ENVIRONMENTAL SUSTAINABILITY POLICY

Integrity Ingredients Corporation promotes an environmentally-friendly culture among its employees and partners. We are committed to environmental sustainability and efficiency to include meeting and exceeding industry standards as well as local and international laws.

We do not utilize any ingredient designated by the Convention on International Trade in Endangered Species (CITES) Appendix or the International Union for Conservation of Nature (IUCN) Red List as a danger to threatened species of plants and animals. Furthermore, we use only materials sourced from areas of non-conflict and with the greatest concern for environmental sustainability.

We also recognize the need to minimize local environmental impacts. We utilize standard practices to maintain and monitor our energy efficiencies in accordance with the Kyoto Protocol. To meet the above goals, we are fully committed to:

- ❖ Monitoring local environmental laws and update standard operating procedures accordingly
- ❖ Working with local environmental group initiatives in order to keep our practices in-line with our values
- ❖ Monitoring suppliers and partners to ensure they are meeting local environmental laws as well as our own standards
