“Advancing the *Beauty with a Conscience* Movement”

The Fusion of Clean Science with Bio-Active Naturals

At Integrity Ingredients Corporation, the fusion of clean science with nature has been at the center of our product innovation since 2005. For almost 20 years, our corporate mission has evolved to propel the pillars of Sustainability, Ethical Sourcing, Social Responsibility and Transparency.

Current and Future Status of Natural Ingredients and Biotechnology

As the demand for natural cosmetic products continues to increase, the challenge escalates to sustain the supply of natural resources. A percentage of the planet’s natural resources are sustainable, and some have been engineered to be so through technological developments, however all are not without the possibility of extinction.

According to the Kew Report, 77% of undescribed vascular plants and 45% of known flowering plants are estimated to be threatened with extinction.¹ According to the United Nations, global natural resource consumption is forecasted to rise 60% by 2060 as compared to the levels of 2020.² And, a new study published in the Nature Sustainability Journal shows 72% of the world’s population lacks resource security.³

Sustainable Solutions

Despite these challenges, biotechnology is emerging as a promising solution to address the reality of natural plant extinction. Due to advanced engineering techniques and scientific innovation, many of the materials created or enhanced by biotechnology can serve as alternatives for natural ingredients. Today, scientists can efficiently produce specific compounds identical to those found in nature, without depleting natural resources. In fact, biotechnology enables the creation of sustainable cosmetic ingredients that are simply not available in nature. The beauty of it all is that Biotech and Nature can ideally co-exist as well as complement one another. And as biotechnology continues to progress, it has the potential to revolutionize the way we produce and consume natural products, making them more sustainable for future generations.

Integrity’s Mission - Advancing the “Beauty with a Conscience” Movement

Today, Integrity Ingredients is taking beauty and personal care sustainability to the next level. In our quest to **Advance the “Beauty with a Conscience” Movement**, we have joined forces with forward-thinking partners to commercialize sustainable, novel innovation and active ingredients that were created via sophisticated biotechnology. As you peruse our Innovation Guide, you will discover a vast array of ingredients that provide many sustainable possibilities that highlight clean, renewable innovation for your product development needs.

Integrity’s Core Values and Goals

We value ethical sourcing, green chemistry and sustainable production. At our core we excel at showcasing our latest technologies that feature advancements in biotech, as well as Clean Science fused with Natural Bio-Actives. We offer safe, cost-effective alternatives for peptide technologies, fermented ingredients, upcycled materials, preservatives, emulsifiers, exfoliants, antioxidants, lipids, and more. We are committed to continuously provide innovative technologies that will inspire and differentiate your formulary endeavors, as well as foster a transparent and empowering relationship as your trusted “Innovation Partner”.

The Multiple Benefits of Lipids in Skin Care

Moisturize: Hydrate and protect the skin barrier.

Nourish: Essential fatty acids, vitamins, antioxidants are nutrient rich.

Protect: Coconut and Sunflower have natural sun protection properties.

Soothe: Chamomile and Calendula calm irritation and inflammation.

Balance: Tea Tree and Grapeseed Oil help to regulate oil production.

Pro-aging: Antioxidants help fight free radicals and prevent wrinkles.

Improve Skin Texture: Regular use of lipids creates smoother, softer skin.

Makeup Removal: Olive and Almond Oil effectively remove makeup.
